3. Before using the Sykla Smart Watch

Make sure the Smart Watch is fully charged. Please charge the Smart Watch for 3 hours before use.

Smart Watch overview:

Figure 1: Smart Watch Physical Characteristics

Figure 1 shows the location of the physical interfaces:

- 1.6" TFT display – display the user interface on watch, and ALWAYS display the time as a regular watch in standby state
- USB port – for charging
- Power – long press to switch ON/Off the Smart Watch. Short press to switch the display On/Off and

- to change time display image
- MIC and speaker – For voice communication

3.1 Power On/Off

Press and hold the power button 5 seconds to turn on/off the device.

3.2 Reset the Smart watch

Press power button for over 6 seconds to reset when the watch is dead.

4A. Getting Started (Android)

The Smart Watch works in tandem with an Android Smart Phone through Bluetooth. The prerequisites are:

- a) The Android version shall be at least 2.2.
- b) The smart phone needs to be loaded with the “SmartWatch” Application package (APK) to

interwork with Smart Watch. The APK is obtained by visiting Google Play, download to the smart phone and install. This is a simple procedure.

- c) Procedure to download and install the “Smartwatch” into the Smart phone.

4.1 Android APK download and installation

Turn on smart watch → Main menu → APP download → Scan the QR code by phone (Fig.2) → Visit the link to download the APK (Fig.3) → Install the APK on the phone.

Fig.2

Fig.3

4.2 Connect Smart Watch with the phone using Bluetooth.

Settings on your phone → Click Bluetooth (Fig.4) →

Find "Smartwatch" in Bluetooth device list (Fig.5) →
Pair with phone (Fig.6).

Fig.6

4B. Getting Started (iPhone)

When connect via Bluetooth to your iPhone the Smart Watch has some basic and useful functionality like making and receiving phone calls and use Siri voice control.

- a) Make sure Bluetooth and Visible is enabled on the Smart Watch.
- b) On your iPhone go to Settings > Bluetooth
- c) Locate the “SmartWatch” and connect to it
- d) The Smart Watch will indicate “Connected”

5. Smart Watch – User interaction and navigation

Navigation:

The Smart watch uses Tap and Swipe for navigation for going from one menu to another.

For menus with sub-menus, returning to the previous menu is by swiping **downwards** on the screen.

Smart Watch notifications:

Smart watch has the following notification icons:

	Missed calls
	Unread message
	Stopwatch on
	Bluetooth on
	Smart watch is connected with phone
	Smart watch is synchronized with phone
	Battery status

8. Troubleshooting

Trouble	Solution
Failure to turn on.	Charge the smart watch for 3 hours with the USB cable provided.
Failure to connect Bluetooth with the smart phone.	Open smart watch, check the “Settings”-- “Bluetooth”. Make sure Bluetooth and Visible is turned on and connected. After power on, watch will try to automatically retry to connect to last phone for 60 seconds.
Failure to control music player	Some music player on smart phone cannot be supported, please download and use another app on

	Android Google play.
Failure to synchronize weather	Please enter the full name of the city, and make sure the Android smart phone connected with WI-FI.
Failure to use camera remote control	Make sure the smart watch is synchronized with the Android smart phone.
Alert sounds even though profile is set for Vibrate or Silent	Some phones (like iPhone) do not fully support the User Profiles. Instead use the SILENT MODE to make sure the watch is properly muted from making any sounds.
Other problem	Please contact support@sykla.com
